Patient Centered Medical Home (PCMH)

What is a PCMH?

A "Patient Centered Medical Home" (PCMH) is *how* health care is delivered to patients. The medical home team at Morris Heights Health center (MHHC) manages care and services for you—acting as the "hub" of your health care. PCMH puts you, the patient, at the center of the health care system, and provides primary care that is Accessible, Continuous, Comprehensive, Family Centered, Coordinated and Compassionate.

MHHC - The Caring Place
www.mhhc.org

Our PCMH responsibilities to you:

- *To listen to your questions and concerns and to explain disease, treatment and results in an easy to understand way.*
- *To coordinate your overall care, sending you to trusted specialists if needed.*
- *To provide you with same day appointments whenever possible.*
- *To provide instruction on how to access the care you need when the office is not open.*
- *To provide clear instructions about your treatment goals and future plans for every visit.*

MHHC - The Caring Place
www.mhhc.org

Your responsibilities in a PCMH are:

- *To ask questions and be active in your care.*
- *To provide your health history, and other important information, including any changes in your health.*
- *To call our office first with your health concerns unless it is an emergency.*
- *To inform us whenever you utilize any other health system such as the emergency room or a self referral to a specialist.*
- *To have a clear understanding about your treatment goals and future health goals.*

Morris Heights Health Center is a recognized level III Patient Centered Medical Home
